

# DRAFT DUNE VEGETATION MANAGEMENT PLAN

## ZONE 5:

The objective of this zone is to reduce the height of regrowth trees and large shrubs to a height of 1m - 1.5m. Retain between 30%-50% foliage cover (ie. prune 50% to 70% low shrubs/trees growth) within the 1.5 – 2.5m view window. Groundcovers will be allowed to grow unrestricted.

Retain specifically identified mature trees. The trees to which this applies are identified on the detailed mapping in Appendix A of the Draft Dune Vegetation Management Plan.

The occasional small tree will be allowed to grow to provide shade and amenity.

### **Council resolution MIN16.375**

- i) Zone 5 – Thin/prune 50%-70% low shrubs/trees within the 1.5m – 2.5m view window
- ii) Zone 5 - Prune trees and tall shrubs to a height 1m-1.5m
