This is the shortest and least trafficked cycle route from Nowra to Jervis Bay with least traffic. Though fairly easy cycling, the route conditions vary enormously, from wide bitumen roads to unmaintained clay tracks through swamps. There are few signposts and a maze of tracks in the Currumbene Forest. To avoid being lost, you need to follow these directions very carefully or use the topographic map (1:25 000 Nowra 9028-3-5).
