

HERE FOR REGIONAL NSW

We're here for HIV prevention,
HIV support and LGBTI health.

Across the South Coast, Southern, Far West and Blue Mountains regions of NSW, ACON's Regional Outreach team is here to help lesbian, gay, bisexual, transgender and intersex (LGBTI) people and people with HIV take control of their health.

Our Regional Outreach team is out, about and in touch with community groups, individuals and services to implement and work together on activities that:

- Support HIV and STI testing, treatment & staying safe
- Promote a positive experience of sexual health
- Provide safe sex information and resources
- Support referrals to appropriate services
- Deliver inclusive service training and support
- Advocate for an informed, healthy, resilient and inclusive LGBTI community
- Strengthen supportive environments

Our LGBTI health priority areas include: HIV, sexual health, mental health, ageing, healthy relationships, alcohol & other drugs, community safety & inclusion, and self determination.
