Explanatory Notes

This compliance checklist has been developed to aid with tank installation and ensure the Rainwater tank installation, location and plumbing will comply with Council requirements.

You must submit this form and receive approval from Council, before installing your tank.

Form No.	Issue Date: 07/2018
Version - 2	Review Date: 6/2019

Tank Installation Details

Will the tank be located more than 450mm from the property boundary? Yes No

Will a sign be affixed to the tank stating 'Rainwater'? Yes No

Will the overflow from the tank be directed into an existing stormwater system? Yes No

Will the tank be enclosed, and any inlet be screened or filtered to prevent insects or foreign matter from entering? Yes No

Will the tank be installed by a licensed plumber? Yes No

If a pump is installed, will it be located and installed to minimise noise nuisance to surrounding residents? Yes No

If tank will have a top-up system will there be a backflow prevention device installed? Yes No

Rebate Information

Shoalhaven Water will only issue one rebate per property regardless of number of tanks.

The total capacity of tanks for a rebate must be greater than 2000 litres. For residential properties the total capacity of tanks must not be greater than 10,000 litres, and for rural properties tank capacity must not exceed 25,000 litres. If tanks exceed the above mentioned limits a Development Application is required.

Tanks must not be a condition of BASIX.

Tanks and installation must meet all relevant standards and building codes.

Any internal plumbing connections must be inspected by Shoalhaven City Council.

A site plan to indicate tank location must be submitted.

I have read and understand the above information.
