### **Effluent Services – Discussion Point**

#### **2 March 2017**

Council considered the report on the future of human waste removal services and resolved to seek tenders for the service. Tenders will be sought mid 2017 to allow for a new contract to commence in March 2018. The charge to customers for services provided under the contract will be full cost recovery from 1 July 2018. Customers will be able to consider the amount of the charges resulting from the tender process through the normal public exhibition of Councils fees and charges in early 2018.

Customers will be able to assess at that time whether they wish to avail themselves of the contract service option or make alternative arrangements to the property servicing needs.

A further update will be provided in the coming months.
