Explanatory Notes

Once installed, all metered services will be levied water and wastewater availability charges based on the size and number of water meter service connections. Sewer and trade waste usage charges may also apply. Fees & charges are available on our website.

- Please note that incorrect or insufficient information will result in delayed installation.
- Payment is required prior to service – payment options are available on the next page.
- Payment of any associated fee does not signify that the application has been approved.

I acknowledge that I have read the information contained on both pages of this form and as applicant and I have notified the owner of impending ongoing charges.

I understand that any payment advice will be emailed.

OFFICE USE ONLY

Form No. 767	Issue Date: 03/2019
Version - 22	Review Date: 6/2019

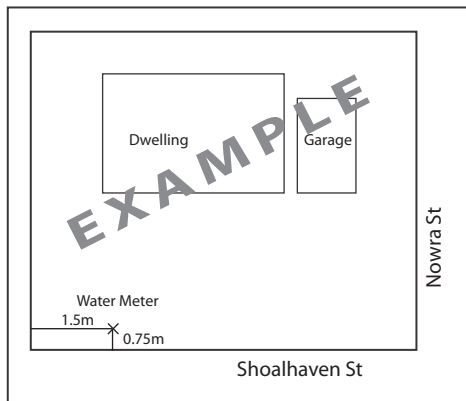

Important Information

- Internal plumbing works are the responsibility of the property owner.
- It is recommended to submit your application at least two months prior to needing water connected.
- In some areas the water main may be on the opposite side of the street to the property and a conduit may already be in place and in this instance the service will be installed in this location. If you wish to place the service in a new location you will incur the full cost for the installation of a new conduit including the road underbore.
- Council reserves the right to alter the position of the service if necessary.
- It is the responsibility of the property owner to ensure the meter is positioned within the correct boundary of the property. Unclear or incorrect boundaries may result in incorrect or delayed installation and additional costs to relocate will incur.
- The nominated location must have a 2m square clearance for installation to occur. Obstructions to the area will result in installation being suspended until area has been cleared.

Meter Location Plan

Please complete a location sketch to mark the desired location you wish the meter to be installed – your application will not be processed without this being completed. Please ensure plan is legible and has adequate information to ensure the position is identifiable.

Important:

Meter location must not exceed 1 meter from front property boundary.

Submitting your Application :

SAVE & RETURN – For your convenience, save this form to your computer, enter the information, then email saved document to: council@shoalhaven.nsw.gov.au

After a review of the application you will receive an email response which if approved will contain payment details.

TABLE 5.4 - Connections to Water Mains

This table is to be used as a guide for connection to Shoalhaven Water mains. A full version of the Water Supply Supplement is available at www.shoalwater.nsw.gov.au - Shoalhaven Water Supplement to the WSAA Water Supply Code of Australia.

Development Type	Nominal Service Line & Meter Size	Comments
Single Lot / Single Dwelling	20mm	In low pressure area's sizes may be upsized to 25mm subject to Shoalhaven Water approval
Single Lot / Single Dwelling plus Granny Flat or Dual Occupancy (attached or unattached)	Individual 20mm or 1 x 25mm	Granny flats approved under state planning policies etc.
Commercial	As per qualified hydraulic calculations	Sizing calculations by qualified hydraulic consultant

Notes:

For Non-residential development the water meter and service size (if greater than 20mm and fire service if applicable) shall be determined by a qualified hydraulic consultant. Please see 'Above 25mm Metered Service & Quotation Request Form'.
