Construction of Chisolm's Creek Bridge – Bundewallah

Dear resident,

Thank you for your continued cooperation over the duration of the project.

Just before Christmas we poured the concrete on the deck and approach slabs and they have now cured sufficiently to allow us to move into a new phase of the project.

The first action will be to remove the temporary bridge and move traffic onto the new bridge.

If everything goes to plan, **we will need to close the road for approx. 3 hours from 11am this Thursday 12th January.**

The closure is to allow a crane to remove the temporary bridge components and relocate them to the storage compound for later collection.

Once this is happens, we will move the traffic on to the new bridge immediately.

This will enable us to complete earth and rockworks around the new bridge.

We will then begin the integration of the old roadwork to the new bridge approaches.

If you have any queries in relation to the project, I can be contacted below by phone or by email.

Council has also created a project page for you to follow and have asked that I pass this on to you.
