

**St Georges Basin - Sussex Inlet, Swan Lake and Berrara Creek
Coastal Management Program
Stage 3 Management Actions - Cultural and Social Issues
St Georges Basin/Sussex Inlet**

Community education on importance of seagrass wrack for estuary health. Removal of seagrass wrack only where DPI-Fisheries issue permits e.g. at boat ramps or for aesthetic/health/recreational amenity at bathing areas only

Interpretive signage, explore more education initiatives for private landholders around Aboriginal heritage and enforcement of fines/penalties. Improved protocols around responding to new indigenous artefacts. Refer estuary-wide action EW-C05

Explore opportunities to connect missing links in foreshore walk around St Georges Basin by provision of boardwalk below High Water Mark, strategic acquisition, need for access to easements for utilities etc.

Review design of Basin Walk to make more resilient against erosion

More educational signage, better protection, enforcement of 4WD restrictions, better education, rezoning of areas to higher environmental protection. Mitigations are very dependent on the site and case by case basis. Some sites will benefit from fencing

Instructions

1. Zoom in to the map to view potential management action
2. Click on an icon to provide comments on the potential action at each location. This will open a web page where you can leave comments on the action and make suggestions.
3. Once you have submitted your response, close the browser window and return to this pdf map to review more management actions. Click on "Back to Get Involved Page" within the web form to return to the Get Involved Page.
4. Once you have reviewed and commented on the management actions, you can return to the Get Involved page by using this link:
