

St Georges Basin - Sussex Inlet, Swan Lake and Berrara Creek
 Coastal Management Program
 Stage 3 Management Actions - Ecological Environment
 Berrara Creek

Review of emergency procedures for this facility and where necessary upgrade to ensure a pollution event does not occur

E25

Development controls, public education, invasive weed management, provide resources to local bushcare groups to manage weeds

E23

Community education, implementation and enforcement of Council's Tree and Vegetation Vandalism Policy, replanting of targeted areas, better protection of significant ecological zones and maintaining no-mow zones, wildlife corridors and habitats.

E33

Targeted ecological surveys to be able to monitor long term trends e.g. changes in vegetation and fauna communities

E01

E21

Monitoring of entrance openings and closures either via citizen science opportunities or remote sensing. Community information and engagement regarding Berrara Creek natural opening and closure regimes and potential impacts of illegal openings.

Updated water quality monitoring program. Publication of swimming suitability results and use of sanitary inspections / investigating source of pollutants if detected.

E22

E24

Exclusion of public access from known nesting sites on southern side of lake entrance during breeding season, educational signage on shorebirds. Continuation of South Coast Shorebird Recovery Program

Instructions

1. Zoom in to the map to view potential management action
2. Click on an icon to provide comments on the potential action at each location. This will open a web page where you can leave comments on the action and make suggestions.
3. Once you have submitted your response, close the browser window and return to this pdf map to review more management actions. Click on "Back to Get Involved Page" within the web form to return to the Get Involved Page.
4. Once you have reviewed and commented on the management actions, you can return to the Get Involved page by using this link:
